

Parameter Personalisasi

$$N = 21, a = 2, b = 1, K = 1, \theta^\circ = 65^\circ, \alpha = 0.002$$

$$D_i = 20 + (K \cdot i) + ((a \cdot i) \bmod 7) - ((b \cdot i) \bmod 5) \text{ untuk } i = 1, \dots, 7$$

$$D_1 = 20 + (1 \cdot 1) + ((2 \cdot 1) \bmod 7) - ((1 \cdot 1) \bmod 5)$$

$$= 20 + 1 + 2 - 1 = 22$$

$$D_2 = 20 + (1 \cdot 2) + ((2 \cdot 2) \bmod 7) - ((1 \cdot 2) \bmod 5)$$

$$= 20 + 2 + 4 - 2 = 24$$

$$D_3 = 20 + (1 \cdot 3) + ((2 \cdot 3) \bmod 7) - ((1 \cdot 3) \bmod 5)$$

$$= 20 + 3 + 6 - 3 = 26$$

$$D_4 = 20 + (1 \cdot 4) + ((2 \cdot 4) \bmod 7) - ((1 \cdot 4) \bmod 5)$$

$$= 20 + 4 + 1 - 4 = 21$$

$$D_5 = 20 + (1 \cdot 5) + ((2 \cdot 5) \bmod 7) - ((1 \cdot 5) \bmod 5)$$

$$= 20 + 5 + 3 - 0 = 28$$

$$D_6 = 20 + (1 \cdot 6) + ((2 \cdot 6) \bmod 7) - ((1 \cdot 6) \bmod 5)$$

$$= 20 + 6 + 5 - 1 = 30$$

$$D_7 = 20 + (1 \cdot 7) + ((2 \cdot 7) \bmod 7) - ((1 \cdot 7) \bmod 5)$$

$$= 20 + 7 + 0 - 2 = 25$$

Himpunan Data $D_1 - D_7$ penjualan

$$= \{ 22, 24, 26, 21, 28, 30, 25 \}$$

Mean

25

$$\frac{260}{7}$$

$$\bar{X} = \frac{\sum D_i}{n} = \frac{22 + 24 + 26 + 21 + 28 + 30 + 25}{7} = \frac{176}{7} = 25.14$$

Hasil akhir mean yaitu 25.14 dan ini merupakan angka per-former toko mingguan

Median

26 28

$$21, 24, 25, 26, 28, 30, 30 = 26 \text{ (median)}$$

Modus

Himpunan ini tidak memiliki modus karena setiap data hanya muncul masing-masing 1 kali

Rango

25

$$\text{max} - \text{min} = 30 - 21 = 9$$

23) merupakan 50% tsih dari penjualan tertinggi

dan terendah dalam satu minggu yang menunjukkan perbandingan yang baik

Standard deviation

$$\sigma^2 = \frac{\sum (D_i - \bar{X})^2}{N}$$

$$\bullet (25 - 37,111)^2 = 117,1379 = 117,138$$

$$\bullet (30 - 37,111)^2 = 50,979 = 50,98$$

$$\bullet (33 - 37,111)^2 = 17,139 = 17,14$$

$$\bullet (35 - 37,111)^2 = 4,579 = 4,58$$

$$\bullet (113 - 37,111)^2 = 39,339 = 39,34$$

$$\bullet (116 - 37,111)^2 = 78,199 = 78,50$$

$$\bullet (118 - 37,111)^2 = 117,939 = 117,94$$

$$\sum (D_i - \bar{X})^2 = 450,86$$

$$\sigma^2 = \frac{450,86}{7} = 64,40$$

$$\sigma = \sqrt{64,40} = 8,02$$
